WORK EXPERIENCE:

08/20 – Present - Web Developer, Freelance

- Creating websites and landing pages using HTML, CSS, JS, and different frameworks
- Hosting a YouTube Channel about QA Testing and web development

01/19 – 10/19 - Project Manager, Perfect Art, Moscow, Russia

- **Management** of 2 different mobile apps development and assisted with the management of web product development (all Swiss clients)
- Analyzed the client's requirements; **created the documentation** for the products; wrote **User Stories** and technical tasks
- Discussed and **approved the products' designs**
- **Coordinated work** of multiple developer teams (including remote and outsourced developers) using Scrum methodology
- **Planned the sprints** and delivered the sprints' results to the clients
- Managed the **process of publishing** mobile applications to the stores
- Learned **Scrum methodology** from scratch and implemented it
- 2 mobile apps were **published** under my lead

04/18 – 01/19 - Quality Assurance Engineer, Perfect Art, Moscow, Russia

- Tested Mobile Apps (iOS, Android) and Web Products (80% - manually)
- Performed **functional, accessibility, regression testing** on every release cycle
- Created and executed software **test plans and test cases**; reported bugs and feature requests
- Designed large scale and detailed test case suites aimed to cover **~100% user journeys**
- I was the only tester on most of the projects so I **created a base of documented test defects** and **organized the testing process**
- **No critical bugs** were found after delivering the products to the clients
- Created and managed the end-to-end testing process for **3 different projects**
